

Attention: All interested stockists and retailers.

I would like to take this opportunity to introduce to you **QuadraByke**, the futuristic 3 in 1 transforming bike!

QuadraByke. Three times the fun.

Youngsters grow up very fast ! They can quickly outgrow their favourite play-equipment in size, in their development and their imagination. Wheeled toys and play bikes in particular rapidly lose their appeal as youngsters progress from four to three to two wheels.

Now however, bicycle designer Tony Wayman (BA MCSD), has come up with an answer. His QuadraByke is a stable four wheeled toy, tricycle and finally, that all important two wheeler - **all in one bike**.

The secret lies in his unique patented multi-axle system which allows Quadra to be rapidly configured from four to three or two wheels, it's your choice. Parents can easily and speedily change the configuration of the wheels to provide their youngsters with a new adventure pedalling experience.

International award winning QuadraByke conforms fully to EU Certification of Standards; from paint to a fully enclosed chain so no little figures can get trapped. The unique axle system facilitates the use of highly efficient front and rear brakes which not only enhance the visual appearance and play value, but they really work as well. QuadraBykes wide wheels give stability, its ball bearing system gives long life and its robust construction resists the inevitable nicks and knocks.

Available in Fire Red, Ice Silver, Kiss Pink and Wave Blue, the Quadra is fitted with white rims which are mounted with custom made puncture proof EVA tyres, soft saddle tops, an adjustable height steering and saddle clamp plus coloured safety hand grips with contrasting brakes and cables, all adding to Quadras appeal.

We are currently looking for interested retailers to introduce this innovative, cutting edge bike to consumers in their local market place. **QuadraByke is receiving constant repeat orders in Europe and Northern Asia as the brands popularity increases. General feedback from retailers is that it is an easy product to sell as the concept is brilliant.** Please feel free to contact us via our website contact page or contact me Robert on **(+618) 0429 088 455** to discuss further.

Yours sincerely,

Robert Scaddan
